

Instructions for Set-top Box Connection

Cable Wall Outlet

1. Connect the cable from wall outlet to the input of Digital Set-top Box. (Hand Tighten)
2. Connect the output of Digital Set-top Box to the TV or VCR input. (Hand Tighten)
3. Plug the AC power adapter plug into the set-top box and an electrical outlet.
4. Turn on TV. NOTE: TV and VCR need to stay on channel 3.
5. Insert the included batteries in remote control.
6. Press power on remote control to turn on set-top box. (See green light on box)
7. Use the new remote to change channels or view menu to see options.

Troubleshooting Tips- No Picture

Double check and review all steps above.

Watch Channel 11 for video instructions aired several times each hour.

Check that power on box (green light) and TV is on.

Be sure TV and VCR are on Channel 3

Refer to booklet included for more equipment set-up options.

Visit www.sanbrunocable.com for additional tips.

If you waited to install the box over a month after receipt, call the office for a "box refresh".

Troubleshooting Tips- No Sound

Be sure your TV volume is raised up.

Use the new remote to raise volume level of set-top box.
